

Nyungwe Forest National Park

Situated in the south east corner of Rwanda, extending for 1 000 square kilometers, is Nyungwe Forest National Park. It is the largest Afro-montane forest in East and Central Africa and one of the most ancient, dating back to before the Ice Age.

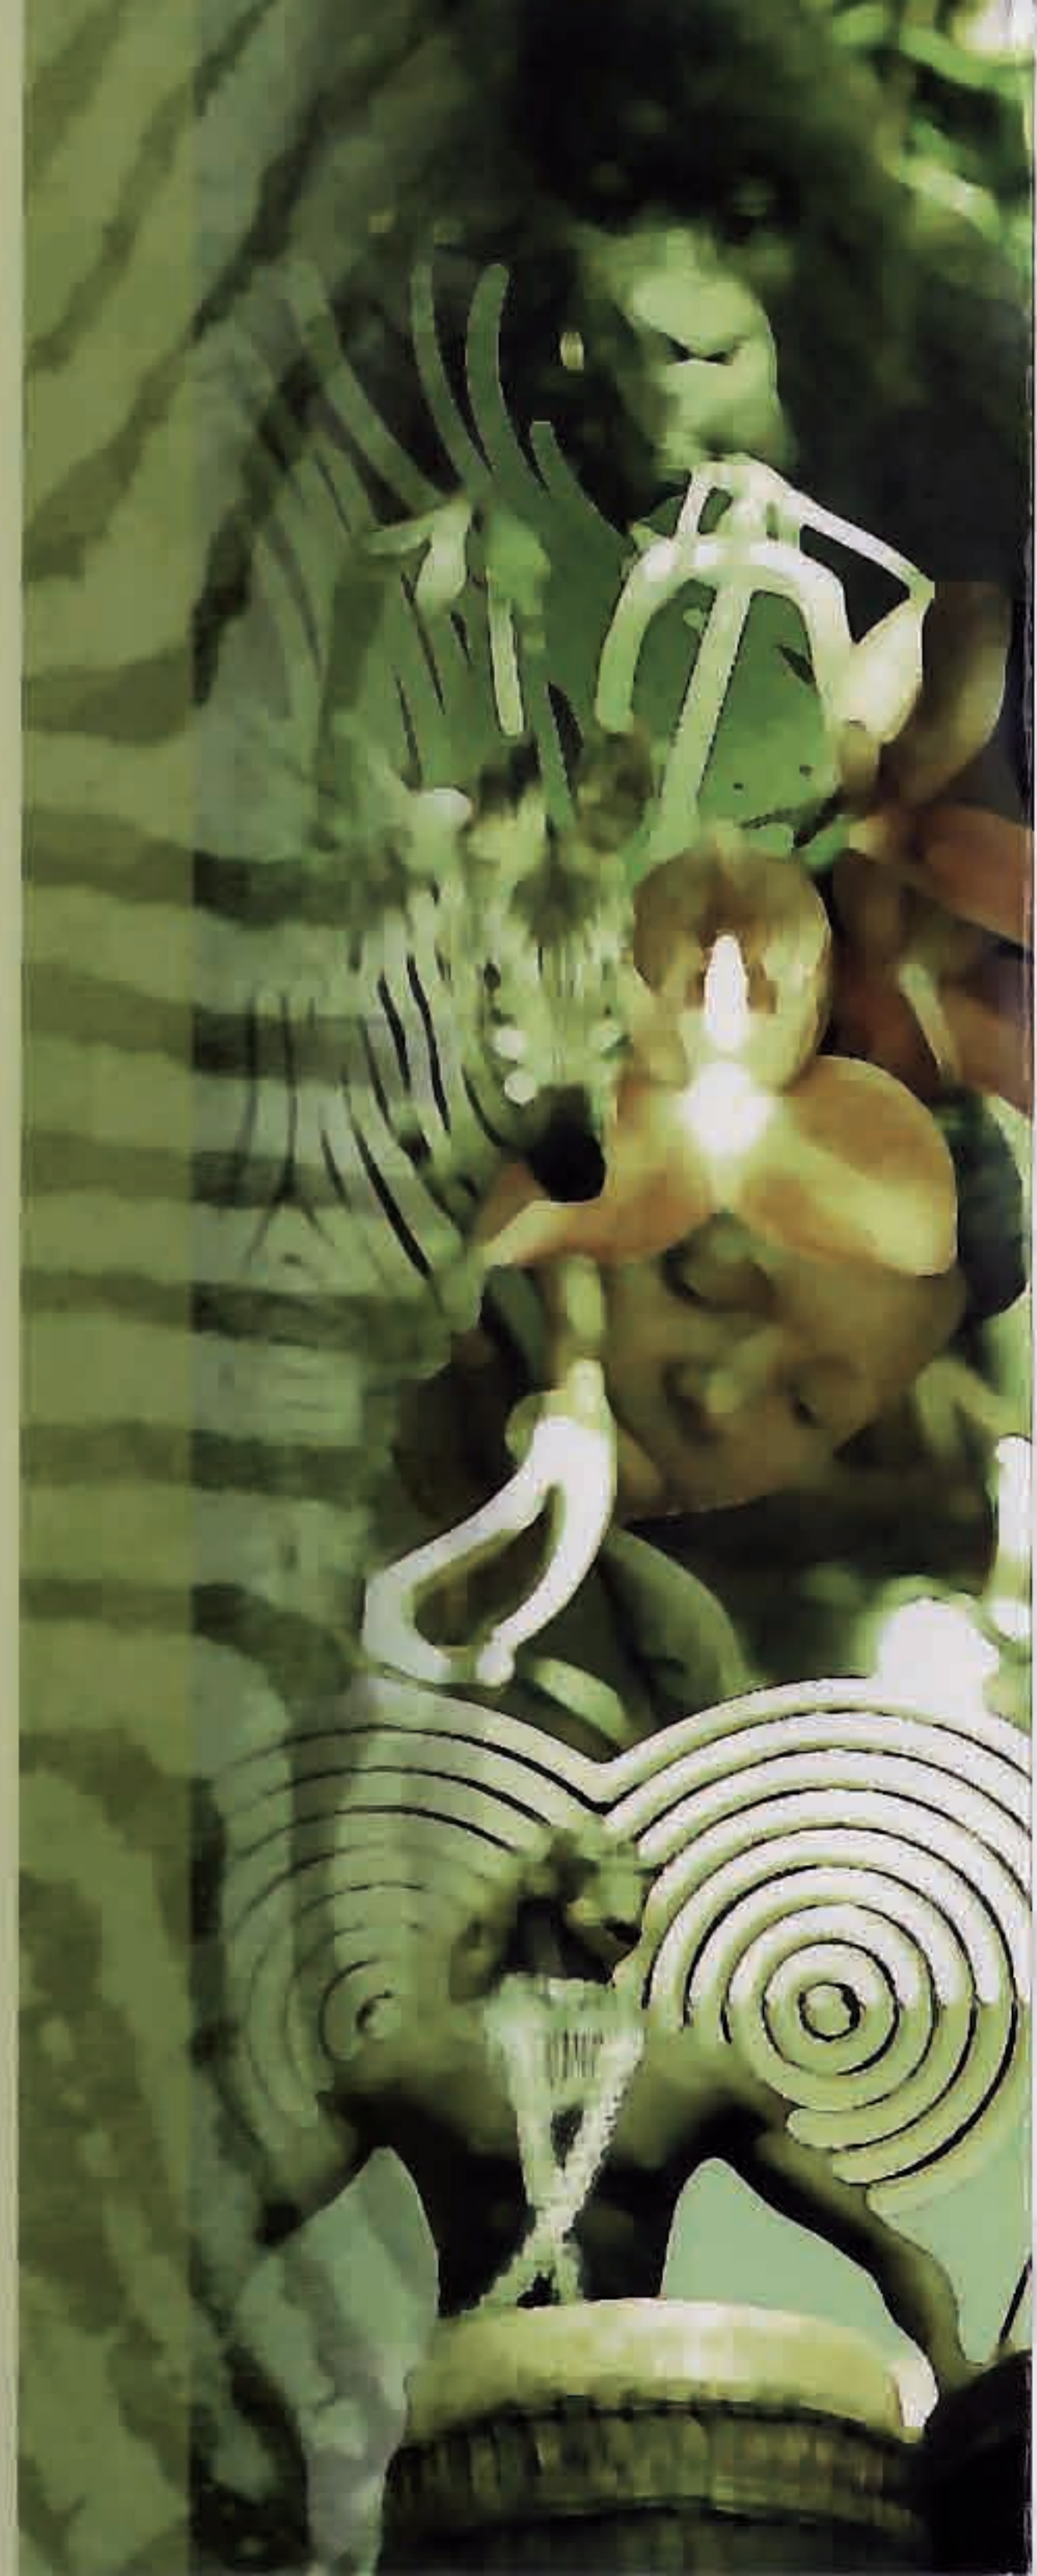

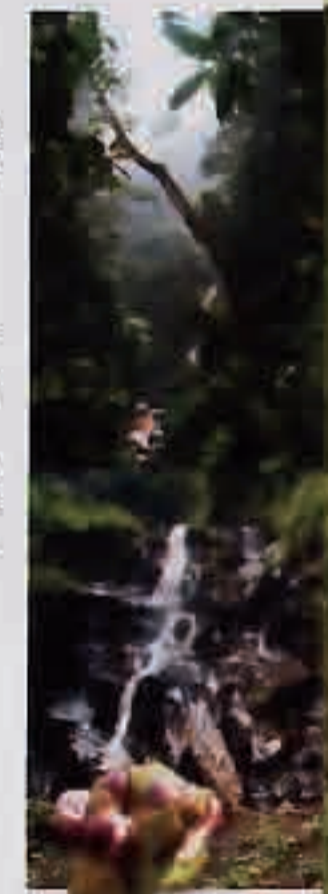

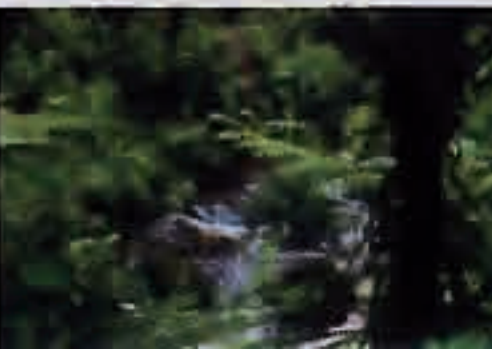

This is the undisturbed rainforest and as you venture into it, it has a dramatic beauty.

The park ranges in altitude from 1 600 m to 2 950 m above sea level, with temperatures ranging between 0°C and 30°C.

With a pre-historic atmosphere it is incredibly rich in biodiversity. The forest supports over 250 different types of trees and shrubs and a vast range of flowering plants, amongst which are over 100 species of orchid and giant Lobelia, which stand out on their own as if extra-terrestrial.

Nyungwe also harbours 13 species of primates, these include chimpanzees and the handsome L'Hoeest's monkey with his flowing skirt. Troops of a hundred strong Angola Colobus are an acrobatic delight. Nyungwe is also home to habituated species such as the Mangaby and the Blue Monkey.
